

WAREHOUSING AND DISTRIBUTION

In a global economy where suppliers, manufacturers and customers are often on different continents, executing supply chain plans is an increasingly difficult challenge. Nippon Express provides the warehousing and distribution network, the systems and the people to meet the most demanding customer service requirements.

Our warehouse facilities in the Americas region are strategically located near all major ocean and air cargo gateway ports, population centers and manufacturing locations. These facilities are more than inventory stocking points. Nippon Express's distribution centers support many types of customer needs, from order fulfillment for high-volume products, to providing after-sale support with parts and reverse logistics capabilities.

Nippon Express Americas region warehouse and distribution center network of exclusively operated logistics service bases consists of 67 facilities with 5 million square feet of operating space in North and South America.

B2C PRODUCTS - OUR eCOMMERCE VALUE ADDED LOGISTICS AND DISTRIBUTION SERVICE

Nippon Express recognized the growth in e-commerce and responded to the demand by servicing this logistics market for goods being sold by companies via the internet directly to individual consumers by developing our B2C product solution in 2000.

WAREHOUSING AND DISTRIBUTION

GLOBAL WAREHOUSE MANAGEMENT SYSTEM: NEWINS INVENTORY MANAGEMENT & FULFILLMENT SYSTEMS

Our entire global network of warehouse and distribution center [DC] facilities is supported by NEWINS (Nippon Express Worldwide Information Network System) warehouse management and fulfillment systems, that links all Nippon Express locations worldwide, and can link to any trading partner in any supply chain.

SUPPLY CHAIN EVENT MANAGEMENT: VISIBILITY AND REPORTING Our customers have visibility into their products, orders and other distribution tasks viewable from any web browser. This on-line asset information capability provides actionable data on demand for specific products that can be used to better plan production needs, inventory location strategies and transportation schedules.

STRATEGIC GLOBAL DISTRIBUTION NETWORK PLANNING Before Nippon Express takes on any warehousing customer, it studies that company's order patterns, inventory needs, transportation flows and overall requirements.

Using sophisticated modeling tools and our deep logistics expertise, we design a strategic distribution network that optimizes service levels and minimizes costs.

Additional capabilities include export packing and crating, foreign trade zones, container freight stations, cross docking, refrigerated services, reverse logistics, service parts management, light manufacturing, pick and pack fulfillment and just-in-time manufacturing support and, select locations are equipped to handle radio frequency identification (RFID) systems.
